# Introduction

This document has release information for NCD ThinPATH teemtalk. NCD licenses teemtalk on the NCD ThinSTAR terminals in two ways:

- bundled with a specific model  
The bundled license key contains the numbers 0806 and allows you to install teemtalk only on specific terminal models.
- available as an option  
The license key for the optional installation of teemtalk contains the numbers 0816 and allows you to install teemtalk on both the bundled terminals and the optional terminals.

## Implementation Notes

1. Installation Requirements
  - NCD ThinSTAR Operating Software, version 2.2 or greater
  - Microsoft Windows 2000 or Microsoft Windows NT 4.0
  - One of the following terminals:
    - ThinSTAR 200 Series
    - ThinSTAR 300 Series
    - ThinSTAR 400 Series
    - Administrative rights to install and configure the software.
2. Installation Notes

The file, ThinPATH\_teemtalk.exe, is a self-extracting executable containing:

  - NCD ThinPATH teemtalk setup
  - documentation
  - update for the ThinPATH Manager's Configuration Tool

Extract the files into the NCD folder. The NCD folder is usually found on:

```
C:\Program Files\NCD
```

but may vary on your system.

**IMPORTANT:** Be sure you specify the parent directory of the ThinPATH Manager folder. If you don't, you might not be able to deploy the Terminal Emulation Client connections that you configure.

### 3. ThinSTAR 232

If you want to expand a current teemtalk installation and you have the appropriate license key, you need the NCD ThinPATH teemtalk software, version 1.5 build XX or higher.

To install teemtalk on the ThinSTAR 232:

- a. Run the setup program.
- b. Select Modify and click Next.
- c. Click Add License Key.
- d. Enter your license key. It should start with 0816 and click OK.
- e. Continue with the installation wizard.

### 4. Deployment Issues

If you have problems deploying Terminal Emulation Client connections with NCD ThinPATH Manager's Configuration Tool, please check the following:

- Ensure that the files configm.exe and pericom.dll are copied to the correct ThinPATH Manager Installation folder.
- Ensure that you are using the correct version of the NCD ThinPATH Manager's Configuration Tool. The Configuration Tool About Box should indicate version 2.20 Build 17.110 or greater. If not, extract the file, ThinPATH\_teemtalk.exe again into the parent folder for ThinPATH Manager.

## Limitations

The ThinPATH Manager's Configuration Tool does not support Terminal Emulation Client connections that use modem sessions settings.

## Product Revision History

This is the first release of NCD ThinPATH teemtalk.

This is the second release of NCD ThinPATH teemtalk.
