

Tisio 96 ThinClient

Superior Access to Microsoft Terminal Services and Citrix solutions

The Tisio product line offers a wide range of thin client terminals for accessing server-based applications. With the Tisio, users can access PC, Web and legacy applications while taking advantage of the low total cost of ownership associated with thin client computing.

The Tisio is brought to you by ThinPATH Systems, the solutions leader in thin-client computing. With Tisio, corporations can enjoy the richness of the PC experience without the associated costs of management and endless replacement cycles of the PC model. Tisio provides an easy-to-manage, low cost desktop solution when combined with the Tisio management software.

The Tisio terminals also include a powerful range of terminal emulators, giving direct access to mission critical applications on legacy systems.

Flexibility of ThinClient Software

The Tisio 96 ThinClient can be configured to run Windows CE, Windows XPe or embedded Linux, depending on the customer's preferences and specific requirements. One outstanding advantage of the Tisio product line is that all three operating systems can be managed simultaneously with the Tisio Device Manager.

Higher Levels of Performance and Flexibility

The Tisio is a state-of-the-art hardware design, manufactured to the highest standards of quality and reliability for the ultimate confidence in a desktop device. With expandability of up to 1GB of system memory, the Tisio supports simultaneous connections to your application servers.

The Tisio can meet unique industry application requirements with its multiple, standard peripheral connectors. It features one serial port, one parallel port, six Universal Serial Bus (USB) ports, and stereo line-in, line-out and microphone ports.

Enhanced Security

With no local hard drive, the Tisio is inherently secure, providing limited access to local devices and protecting against viruses and other malware. Sensitive data is stored on the server and remains compliant with privacy regulations.

Tisio Device Manager Software Adds Value

Tisio Device Manager (TDM) is an application that enhances the functionality and flexibility of Microsoft and Citrix server-based computing. TDM delivers true "hands-free" management and administration. Each terminal's personality can be configured remotely. System administrators can configure terminals individually or in workgroups for fast and easy set-up.

World-Class Service

The ThinPATH Systems team has extensive experience in thin client computing. As a company, ThinPATH Systems is committed to providing expert service and support on all current products and technologies. Our vision, and therefore our mission statement, is to provide all users with real value for their money without sacrificing quality, reliability or service.

Tisio – For Peace of Mind

Tisio takes advantage of ThinPATH System's experience in simplifying access to network-based information and applications. Our hardware and software, combined with ThinPATH System's exceptional pricing, provide the most reliable, manageable and affordable thin-client solutions.

Tisio 96 ThinClient

Feature	Windows CE 5.0	Windows XPe	Linux
Citrix ICA 9 client	X	X	X
Microsoft RDP5.2	X	X	X
UNIX/IBM Terminal Emulation	X	X	
Microsoft Internet Explorer	X	X	
Firefox			X
LPD/ICA/RDP/ThinPrint printing	X	X	X
ThinCCO Device Manager (TDM)	X	X	X

Hardware

Processor	VIA C7 1GHz
Chipset	VIA CN700 VIA VT8237R plus
FSB	400MHz
Memory	128MB or higher
Memory Type	DDR2-533
Max. Capacity	1GB
Memory Sockets	1x
Storage Media	128MB IDE Flash or higher

Ports and Connections

USB v2.0	2x front and 4x rear
PS/2 Ports	Keyboard and Mouse
Ethernet	1x RJ45 LAN
Serial ports	2x COM
Printer	1x LPT port
Display	1x Sub-D
Sound	1x Line In (rear) 2x Line Out (front/rear) 2x Mic (front/rear)

Graphics and Audio

Display Chipset	VIA S3 UniChrome Pro
Shared Memory	up to 64MB
Max. Resolution	1600x1200
Color Depth	32bit
Audio Type	Stereo
Audio Codec	AC97 Codec 5.1Ch

Networking

Network Chip	Realtek RTL8100C
Network Speed	10/100 MBit/s
Speed Autosense	Yes

Mouse

PS/2 interface, wired optical 3-button wheel mouse w/ 400dpi resolution

External Power

Input	100-240V~ 1.5A 50-60Hz
Output	19V - 3.42A

Mechanicals

Unit Size	8 3/8 x 2 1/5 x 9 1/4 in 213 x 64 x 234 mm
Weight	6.6 lbs, 3 kg

Regulatory

CE, FCC Class B, TÜV, Safety UL, GS, RoHS

Available Options

- WLAN USB Stick 802.11b/g
- Keyboard (104-Key US)
- Keyboard (105-Key UK/DE/FR/CH)
