

ThinPATH PC Suite

Transforms PCs Into
Easy-to-Manage
Thin Clients

ThinPATH® PC Suite Highlights

Full functionality of a PC and...

- Benefits of a thin client
- Low cost bundle pricing
- Central Configuration and Administration
- Protection from Unauthorized Changes
- Reduced IT Costs and Help Desk Overload

ThinPATH PC Suite

ThinPATH PC Suite software combines an easy-to-use, intuitive, desktop interface with a server-based management package to fully handle from tens to thousands of PCs as ultimate thin clients, reducing the total ownership cost of each PC.

ThinPATH PC Suite combines ThinPATH PC, ThinPATH Management Portal and ThinPATH Desktop Mirror, offering a savings of 40% over the price of the individual products.

If you have thought about deploying thin-client devices, but you are not convinced they will meet future desktop requirements, then try ThinPATH PC Suite for a low-risk, high-function intermediate step.

ThinPATH PC Converts PCs to ThinPCs

ThinPATH PC software provides controlled access to local and server-based applications with no investment in specialized desktop hardware by transforming your PC into a manageable thin client. This provides your IT department with a dependable, easy-to-use and cost-effective solution to improve the manageability of your organization's PCs with minimal impact on existing corporate infrastructure.

Access Server-based and Locally Installed Applications

Gain access to windows-based applications through Citrix Presentation Servers ICA and Microsoft Terminal Services RDP technology. However, the ThinPC need not be used exclusively for server-based applications. Since certain applications, such as Internet Explorer and video, do not run efficiently on a multi-user server, run a local Internet Explorer browser complete with plug-ins. Lock it down to secure the desktop. Run local terminal emulators. ThinPATH PC offers administrators the ability to specify the list of applications that the user may execute locally.

Users may require access to local devices such as a CDROM drive, a scanner or a biometric device, not normally supported on most thin-client hardware. ThinPATH PC supports all devices that your PC supports.

Protect PCs from Changes & Reduce IT Costs

ThinPATH PC Suite presents the end user with a pre-configured user interface that only allows access to designated applications. Unless authorized, users can make no changes to the list of available applications or servers. By controlling and limiting user-created desktop configuration changes, the problems associated with user errors are mitigated.

The ThinPath Portal provides centralized server-based configuration management which enables the flexibility necessary for the infrastructure without the problems associated with individual user-altered configurations. This translates into reduced demand upon the IT resources and lower cost of desktop ownership.

Configure, Deploy and Maintain Software Centrally

The ThinPATH PC software is easily distributed to PCs through ThinPATH Portal, utilizing Web Services both for software distribution and management to fit LAN and WAN desktop connections. Updates are handled automatically, so your thin PCs always have the latest software. You can group related desktops and distribute custom configurations and connections to match organizational structures. For more detailed information about the ThinPATH Management Portal, please visit www.tp-sys.com, select the Products tab and ThinPATH Portal.

Easy to Transform & Manage Thin-ified PCs

ThinPath PC makes thin-ified PC use and management easy by providing centralized software deployment, configuration management and distribution. With the one click install, an open PC can be converted to a managed, controlled ThinPATH PC desktop.

ThinPATH PC Desktop Mirror

Included in ThinPATH PC Suite is ThinPATH Desktop Mirror. ThinPATH Desktop Mirror enables remote, centralized desktop access for PCs and supported WBTs. Via the ThinPATH Portal Explorer, the Portal's user interface, administrators can request to "mirror" a managed desktop at any resolution or color scheme and access both the keyboard and mouse. The entire managed desktop, including terminal emulations, web browser, and setup/configuration screens, is visible to support remote assistance and management.

ThinPATH PC Suite Technical Support

ThinPATH PC suite includes one month of technical support provided via email. ThinPATH Systems also offers extended service agreements for telephone technical support. Contact your ThinPATH Systems representative for information on specific options available to you.

ThinPATH Training and Consulting

ThinPATH Systems works closely with your implementation team and certified training partners to provide the resources for successful ThinPATH product rollouts. ThinPATH product training and consulting covers all ThinPATH products and can extend to third-party hardware and software. For further information contact your ThinPATH Systems representative.

Product Licensing

Licensing for ThinPATH PC Suite is done on a per-seat basis. ThinPATH PC Suite includes a product license for each of the three major components: ThinPATH PC, ThinPATH Portal and ThinPATH Desktop Mirror. A product license is required for each managed PC desktop, for access to ThinPATH Portal and for use of the mirror feature.

ThinPATH Annual Subscription Plus

ThinPATH's optional Annual Subscription Plus is a cost effective way to ensure you receive the benefits of ongoing improvements made to the ThinPATH PC Suite software you own. ThinPATH Subscription Plus provides one year of software updates and E-mail support. Purchase this service for added peace of mind and to avoid having to purchase new software with each release.

ThinPATH PC Suite Detailed Specifications

ThinPATH Management Portal Requirements

Operating System Software

- Windows® 2003 Server Service Pack 1
- Windows 2000 Server with Service Pack 3
- Internet Information Services (IIS), Version 5.0 or 6.0 (English Language version only)

Server Hardware

- Pentium (400 Mhz) or greater
- 256 MB RAM
- 100 MB Available hard disk space

ThinPATH PC Requirements

Operating System Software

- Microsoft Windows 2000 Professional (Service Pack 3)
- Microsoft Windows XP (Service Pack 2)
- Microsoft Windows XPe
- Microsoft Windows NT4 workstation (Service Pack 6)
- Microsoft Windows 95/98
- Microsoft Internet Explorer version 5.5 or greater

Desktop Hardware

- Pentium (90 Mhz) or greater
- 32 MB RAM
- 20 MB Available hard disk space
